

Build once. Govern once. From BI to AI.

One governed product. Many uses.

Enterprises still rely on BI, dashboards, spreadsheets and applications. AI adds new ways to consume the same information.

YOUR DATA HAS MORE CONSUMERS THAN EVER

ALREADY CONSUMING YOUR DATA

BI Dashboards Excel Applications
Reporting

NOW JOINING THEM

Conversational AI AI applications Agents
APIs

Nothing leaves the list. The list gets longer.

THE DATA ISN'T THE WHOLE PRODUCT

Business meaning

Quality

Lineage

Policy

Access

Evidence

That context stays with the governed product wherever it is used, from BI to AI.

ONE PRODUCT. MANY USES.

SUPPLY CHAIN

Shipment Risk

One governed data product

Power BI

Excel

Operational application

LatticeGPT

AI agent

API

Different experiences. Different users. Different decisions.
The same governed foundation.

Reuse does not mean unrestricted use. Lattice applies the appropriate access and policy controls wherever the product is consumed.

START WITH ONE DECISION. BUILD SOMETHING REUSABLE.

01

What decision needs to be made?

02

What information is required?

03

What does the data mean?

04

Who should be able to use it?

05

What evidence is needed to trust it?

BI isn't going away. AI is joining it.
